**Working to
RENEW the PLANET...**

ABOUT SUSTAIN SAKURA

Sustain Sakura – the company's name was coined from a combination of the cherry blossom of Himalayas or the Japanese flower Sakura, which needs to be sustained for years due to environmental conditions. The blooming of the cherry blossom trees is often considered a sign of good luck and prosperity. Notably, the delicate and fragile nature of the flowers reminds us to appreciate life's beauty and cherish the present moment.

Sakura or cherry blossom, is a national flower of Japan. It is a symbol of spring and renewal in many cultures, particularly in Japan, though short-lived. It is not only beautiful to watch, but it also holds deep cultural and historical significance. However, in recent years, the future of Sakura and such other species have come under threat due to environmental factors such as climate change and urbanization. The mankind has an inevitable and prime responsibility to prevent such happenings, which also affects us and future generations.

SERVICES

SAFETY PROGRAM DEVELOPMENT

- ✔ Prepare safety policy as per guidelines
- ✔ Maintain updates in line with best practices-Industry/International
- ✔ Review and advise on safety documentation, including reporting system
- ✔ Develop safety manual for company-wide implementation

- Maintaining Approved Vendors Lists (AVLs)
- Pre-bid support for EPC projects
- Strategic global sourcing
- Desk/Direct expediting of engineered packages
- Arranging third-party inspection services
- Project coordination
- Pre-qualification support with oil/gas companies
- Supplier Relationship Management (SRM)

SEGMENTS

- Manufacturing units
- Chemical process industries
- On-shore & Offshore oil/gas projects
- Power plants
- Warehouse units
- Third-party service providers
- Micro, Small, Medium Enterprises – Pan India

CITATIONS

The great Tamil poet **Thiruvalluvar** who has lived about 2000 years back mentions the importance of sustainability and environment amidst technological developments and stresses the need to prevent the planet from all negative impact, through the following couplet. Though you are acquainted with the (theoretical) methods (of performing an act), understand the ways of the world and act accordingly.

“செயற்கை அறிந்த கடைத்தும் உலகத்து
இயற்கை அறிந்து செயல்”. (குறள்-637)”

Peter Drucker who is regarded as the father of modern management said the below lines, which also aligns us with the concept of renewing the planet.

“The best way to predict the future is to create it.”

The famous Indian Industrialist **Anand Mahindra** has remarked that

“Sustainability has to be a way of life to be a way of business”
